PROVEN TOOLS AND RESOURCES FOR YOUR **HIGHER ED LEARNERS**

Transitioning from High School to College is a challenge – you can provide your students with the tools they need to succeed.

Discover an **anytime, anywhere** approach to learning that allows your students to study away from the classroom or lab environment — an ideal solution as 85% of all learning stems from independent reading (*Mist & Simpson, 2000*).

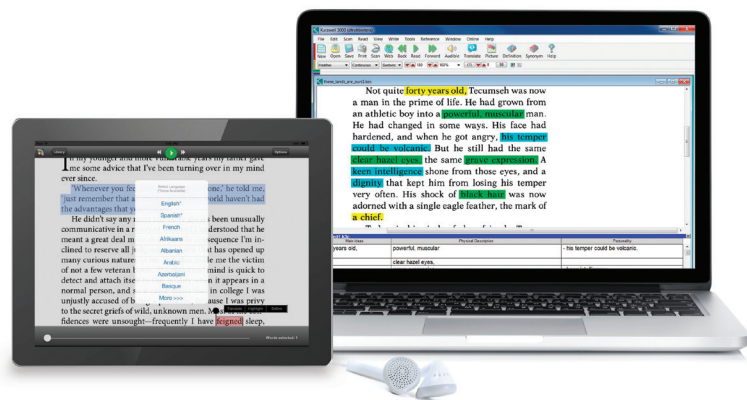

Conquer literacy challenges and unlock your learners' potential to **READ, COMPREHEND** and **DEMONSTRATE** their knowledge using technology-based tools and resources from Kurzweil Education.

Our innovative technology supports students who:

- are underprepared or overwhelmed with college coursework
- have a learning disability, or disability-related functional limitations
- are from a different country, or who struggle with English proficiency
- have demands outside of class, such as athletes, parents, or working students

Kurzweil Education Addresses the Retention and Graduation Challenge:

- 30% of college and university students drop out after the first year
- 50% never graduate
- 70% of at-risk students who take one or more remedial classes in college do not obtain a degree

SOLUTION WITH A FREE TRIAL OF KURZWEIL 3000®-FIREFLY® TODAY!

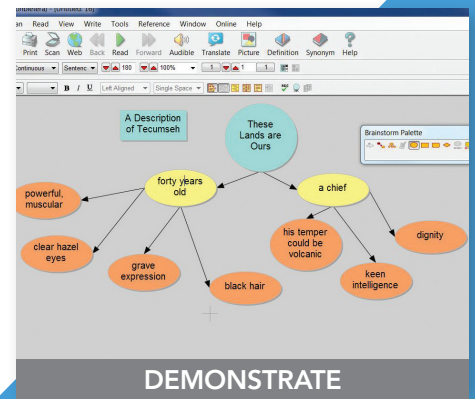

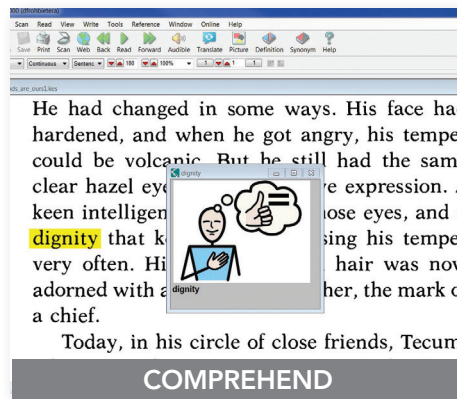

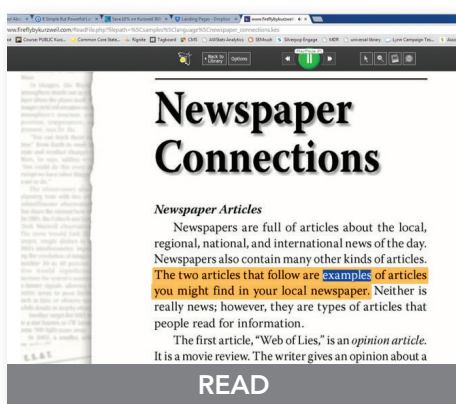

KURZWEIL 3000-FIREFLY PROVIDES A MULTISENSORY APPROACH TO LEARNING

Thousands of educators across the U.S. and worldwide, are choosing Kurzweil 3000-firefly—a cost-effective solution for providing literacy support accessible to students wherever they may be studying.

Using Universal Design for Learning (UDL), our software helps **learners to engage actively in authentic learning experiences in the ways that work best for them.** This innovative learning environment allows students and educators to work directly on either the Windows® or Macintosh® platforms, through the web-based firefly application, or through the firefly iPad app. What's more, all are connected via a centralized user management, file storage and reporting system.

Together we can improve literacy and transform all students into confident, independent and successful learners with a path forward.

Here's how it works...

Kurzweil 3000-firefly is literacy support software that gives all students the ability to access content and learn alongside their peers. Students of all levels can learn from the same materials, which are accessible through the system's cloud-based library.

READ

Translating text into audio and visual presentation formats (text-to-speech) increases reading **speed and accuracy** and enables students to overcome deficits in decoding. Available in 18 different languages and dialects all with **human-like Acapela voices**.

COMPREHEND

The delivery of audio and visual reinforcement improves reading comprehension of larger volumes of complex text and strengthens retention while **improving the learner's ability to focus**.

DEMONSTRATE

Key information and supporting evidence can be extracted into outlines, then seamlessly moved from brainstorm to completed written work within the same system. Tests can be taken at each **learner's own pace**.
